

At the Request of the Lake Arrowhead Board of Directors, please harvest all Yellow Bass that you catch. These fish have somehow been introduced to our lake and are very harmful to our game fish population. **If you catch any of this species, please do NOT throw them back in to the lake.**

Thank you for your cooperation!

Yellow Bass

Yellow Bass have yellowish to goldish sides with 6 or 7 black horizontal stripes that are very distinct. Yellow Bass resemble White Bass, but the stripes below the lateral line are broken just ahead of the anal fin, the dorsal fins are joined at the base and lower jaw protrudes only slightly beyond the upper.
